INSEAM	75	76	77	78	79	80	81	82

Sizing tips:

- 1 All of our shirts are designed to be tight fitting (no excess material) so if a rider prefers a looser fitting garment he or she should size up.
- 2 The increase between sizes is gradual (i.e. if you like a very loose fitting garment and you are at the top end of a size it may be better to go two sizes up)
- 3 Very few people fall into an exact size when looking at the detailed measurements. The most important measurements to look at are the chest and waist. If you are above or close to the limit of either of these measurements it is unlikely the shirt will fit or it will feel too tight. Don't take a chance!!!
- 4 If riders are still unsure we have a full size curve at our offices based in Cape Town where riders can come and fit.
- 5 Riders can also give us a call to talk through their sizing decision. We size people on a daily basis so we should be able to assist if riders are unsure.
